

Surveillance Update

Dental Care for Children — North Carolina 2008

Percentage of NC Parents Who Reported that Their Child Has Been to a Dentist in the Past Year, by Child's Sex

Percentage of NC Parents Who Reported that Their Child Has Been to a Dentist in the Past Year, by Child's Race

Percentage of NC Parents Who Reported that Their Child Has Been to a Dentist in the Past Year, by Child's Age Group

Percentage of NC Parents Who Reported that Their Child Has Been to a Dentist in the Past Year, by Parent's Education Level

The North Carolina Child Health Assessment and Monitoring Program (NC CHAMP) is a surveillance system that collects information about the health characteristics of children from birth to age 17. NC CHAMP is a follow-up survey of the Behavioral Risk Factor Surveillance System (BRFSS) which is a telephone survey of adults, ages 18 and older. All adult respondents with children living in their household are invited to participate in the CHAMP survey. One child is randomly selected from the household and the adult most knowledgeable about the health of the selected child is interviewed in a follow-up survey. This surveillance update includes data collected in 2008 on 2,822 parental surveys of children ages 1 to 17 who reported that their child has seen a dentist within the past year (including all types of dentists, orthodontists, oral surgeons, and all other dental specialists, as well as dental hygienists). For more detailed information than what is presented here, including confidence intervals for the prevalence rates reported above, please visit the NC CHAMP Web site at: www.schs.state.nc.us/SCHS/champ.
