

Surveillance Update

Children with Special Health Care Needs — North Carolina 2006–2007

Percentage Of NC Parents Who Reported That Their Child Has Special Health Care Needs, By Child's Sex

Percentage Of NC Parents Who Reported That Their Child Has Special Health Care Needs, By Child's Race

Percentage Of NC Parents Who Reported That Their Child Has Special Health Care Needs, By Child's Age Group

Percentage Of NC Parents Who Reported That Their Child Has Special Health Care Needs, By Parent's Education Level

The North Carolina Child Health Assessment and Monitoring Program (NC CHAMP) is a surveillance system that collects information about the health characteristics of children from birth to age 17. NC CHAMP is a follow-up survey of the Behavioral Risk Factor Surveillance System (BRFSS) which is a telephone survey of adults, ages 18 and older. All adult respondents with children living in their household are invited to participate in the CHAMP survey. One child is randomly selected from the household and the adult most knowledgeable about the health of the selected child is interviewed in a follow-up survey. This surveillance update includes data collected in 2006 and 2007 on 5,700 parental surveys of children ages birth to 17. Results presented here are for parents who reported that their child currently has a medical, behavioral, or other health condition that has lasted or is expected to last for at least 12 months that leads to the need for: 1) more medical care, mental health, or educational services than is usual for most children of the same age; or 2) medicine prescribed by a doctor. Percentages are weighted to population characteristics. For further information about NC CHAMP, please visit www.schs.state.nc.us/SCHS/champ.
